

STEP 2: TOOLS AND RESOURCES

EVALUATE YOUR NEEDS AND ASSETS TEMPLATE

Use this *Needs and Assets Evaluation Template* as a starting point to collate the data you have gathered. Assembling all of your data in one place helps to provide you with an overview, or "big picture," of the assets you have and the needs of students in your school. This overview will then help you determine which activities you might organize to engage all students in your school in intramurals. Remember it is always good to start with your assets and what you are most familiar and comfortable with when deciding what you and your committee will plan and run.

Customize this template to include any data that is relevant to your school community. You can add more columns or customize the columns to meet your needs.

Our Assets <i>(people, spaces, times, equipment)</i>	Student Interests and Needs <i>(grades, ages, abilities, diverse groups)</i>	What else do we need to know before beginning our planning?	Who else can help us find this information?

Potential intramural activities to offer based on our assets and needs. <i>(consider space, time, number of participants, and number of organizers needed)</i>
