

Inquiry-Based Learning Model for Informed Decision Making (General)

1. Formulate questions

Sample Question:

What do I want to know more about to keep myself safe and stay healthy?

2. Gather and Organize

Sample Questions:

- What information do I need to answer my question?
- Where can I find it?
- How will I organize my information to help me answer my question?

3. Interpret and Analyze

Sample Questions:

- Does the information I have help me answer my question?
- Is my information from someone who knows about ways I can keep myself safe and healthy?
- Does it tell me different ways I can keep myself safe?
- Do I need to know anything else and where can I find more information?

6. Reflect

Sample Questions:

- How will I know if the decision I made was the right one to keep myself safe and healthy?
- Is there anything I might want to start doing or stop doing to care for my mental and physical health?

5. Communicate

Sample Questions:

- Who do I want to tell my decision to?
- What will I share?
- How will I share it?
- How will I be aware of other peoples' choices and feelings?

4. Evaluate and Draw Conclusions

Sample Questions:

- Based on the information I have gathered, what is the best decision for me to keep myself safe and stay healthy?
- Why is it the right decision for me?
