

# Cricket

# Includes Cricket Variations (for Example, T10 Cricket, Kanga Cricket/Cricket Wicket/Continuous Cricket)

#### **ELEMENTARY - CURRICULAR 2024**

- Consult **Disability-Centred Safety** if your groups of students include students with disabilities.
- Modified cricket lead-up and development games/activities can be played both indoors/outdoors.
- The official game of cricket is not an appropriate activity at the Elementary Curricular level.
- Consult Risk Management.
- The safety standards for this activity must be presented to the activity provider prior to the activity taking place. The activity provider must meet the minimum requirements listed in the safety standards.
   For more information on planning trips using outside providers, consult Outside Activity Providers.

# **Equipment**

- Determine that all equipment is safe for use (for example, no sharp corners, cracks, or splinters).
   Students must be encouraged to report equipment problems to the Teacher.
- Regulation cricket equipment must not be used.
- Indoors or Outdoor only non-regulation cricket bats, wickets, and balls must be used.
- Non regulation cricket equipment includes:
  - Bats (for example, made from moulded plastic)
  - Wickets (for example, sprin back wicket stumps, made from moulded palstic)

 Balls must be suitable for the types of bats chosen and have a softer core (for example, foam core, Incrediball, soft rubber cricket ball, cricket tennis ball, PVC soft cricket training ball).

Refer to the **First Aid** section for first aid equipment requirements.

# Clothing/Footwear/Jewellery

- Appropriate clothing and footwear must be worn. Studded cricket shoes are not permitted.
- No exposed jewellery permitted.
- When long hair poses a safety risk it must be secured. Devices (for example, hair pins, elastics and barrettes) used to tie back long hair must not present a safety concern.
- Students must not participate when the length of fingernails poses a safety risk to themselves or others.

# **Facilities**

- Determine that all facilities are safe for use. Students must be encouraged to report facility problems to the Teacher.
- Playing surface and surrounding area must be free of all obstacles and must provide safe footing and traction.
- For both indoor and outdoor, the cricket pitch (area from wicket to wicket) must be level and smooth
  (for example indoors use gym floor, mat wicket and outdoors use natural turf, artificial turf or mat
  wicket).
- Walls, stages, equipment, trees, and posts must not be used as turning points, finish lines, end zones, or boundaries. Establish a clearly delineated boundary line away from the hazards, using visual markers (for example, lines, pylons), to prevent contact/collision.
- Consult <u>General Safety Standards for Facilities</u> for the opening and closing of gymnasium divider doors/curtains.

- When running takes place off school site for a warm up:
  - Teachers must do a safety check 'walk through' in order to identify potential problems prior to initial use of route or course.
  - Teachers must outline to the students the route or course (for example, notice of areas to approach with caution) before the start of the run.
  - Teachers must determine that students are not crossing busy intersections unless directly supervised.

## Outdoor cricket

Holes, hazards (for example, glass, rocks, sprinkler heads, sewer grates), and severely uneven surfaces
must be identified. The conditions must be made safe or the activity must be modified or moved to a
safe location. Hazards which cannot be removed must be brought to the attention of the participating
students. The Teacher must notify the Principal/Designate of unsafe field conditions.

# Indoor cricket

- The playing surface and surrounding area must be free of all obstacles (for example, table, chairs, piano) and provide safe footing and traction. Hazards which cannot be removed must be suitably marked and must be brought to the attention of the participating students. Teachers must notify the principal/designate of unsafe gymnasium conditions.
- Check that the size of the gymnasium can accommodate the activities.

# **Environmental Considerations**

- When environmental conditions may pose a risk to student safety (for example, thunderstorms
  [lightning] or student(s) with asthma, triggered by air quality), Teachers must take into consideration
  their school board/school's protocols and procedures related to:
  - o environmental conditions (consult Weather); and

- insects (for example, mosquitoes and ticks [consult the school/school board's protocols and/or regional Public Health Department's website]).
- Students must receive instruction on safety procedures related to environmental conditions and be made aware of ways to protect themselves (for example, sun burn, heat stroke).
- At all times the school board's weather and insect procedures are the minimum standards. In situations where a higher standard of care is presented (for example, outside activity providers, facility/program coordinators), the higher standard of care must be followed.

# **Special Rules/Instructions**

- Be aware of students whose medical condition (for example, asthma, anaphylaxis, casts, previous concussion, orthopaedic device) may affect participation. Consult Medical Conditions.
- Students must not participate in the activity until they receive information on concussion prevention specific to the activity, inherent risks of the activity (for example, outline possible risks and ways to minimize the risks), and procedures and rules for safe play. Students must receive instruction on the importance of reporting symptoms related to a suspected concussion.
- Refer to school board policies and procedures (i.e., transportation, excursion/field trip) for communication with parents/guardians, the location of an off-site activity, means of transportation, supervision ratios, and parent/guardian permission.
- Activities must be modified according to the age, ability level, language, and experience of students, number of participants, and the facility available.
- Previous training, fitness level, and the length of time and intensity of physical activity must be taken into consideration.
- Activities must be based on skills that are taught.
- Skills must be taught in proper progression.
- Fielding skills should include communication skills (for example call the ball and yielding to another student who has called the ball).

- The bowler standing behind a designated line must underhand lob or roll the ball (grades 1-3) at the batter's wicket.
- Types of throws by the bowler (grades 4-8) may include underhand lob, overhand lob, straight arm overhand throw as determined by the abilities of participants.
- Bowlers must send the ball towards the wicket in a manner that reaches the batter below the batters'
  waist.
- Bowlers should not aim at the batter or throw the ball above the batters' waist.
- The students must be informed about the importance of keeping their eyes on the flight of the ball when playing offense and when playing defense.
- Sliding is not permitted by batters.
- The players must be taught to carry the bat with them after they hit the ball and not to drop or lay it down.
- Establish a designated area, away from the batter, where the wicketkeeper must retrieve the bowled ball to avoid being hit by a swinging bat.
- A proper warm-up and cool-down must be included.
- Warm-ups and drills (for example, bowling, batting, throwing, stretching) must each be in a dedicated area so that one activity does not present a hazard to another.
- While moving, students must not be required to close their eyes or be blind-folded.
- Emphasize controlled movement when requiring students to walk or run backwards. Backward-running races are not permitted.
- When a student displays hesitation (verbally or non-verbally) with participating, the Teacher must
  determine the reason(s) for doubt. If the Teacher believes that a potential hesitancy during the skill
  could put the student at risk, the student must be directed toward a more basic skill, or be permitted to
  select a role within the activity at their comfort level, including the choice to not participate.
- Prior to participation, the Teacher must reference and apply their school board's policy on equity and inclusion as it affects student participation and makes appropriate accommodations/modifications to

provide a safe learning environment. Consult the Intent subsection within the About section.

- Adequate liquid replacement (personal water bottles, water fountains) must be accessible for students before, during, and after physical activity to prevent dehydration.
- Students must be informed that the use of equipment and the gymnasium are prohibited without supervision. In addition to verbal communication, the doors must be locked or signs must be posted indicating that students are not allowed to use the gym unless appropriately supervised.
- Establish and communicate to students a designated area away from the field of play, where nonactive players can wait, to avoid interfering/colliding with players on the field.
- Establish and communicate to students a designated area where batter can make an uninterrupted swing and avoid hitting other players (for example wicketkeepers, fielders, student umpires).
- When the activity involves a student swinging a bat, during instruction or in a game situation (indoors
  or outdoors) establish a designated area where the batter can make an uninterrupted swing and avoid
  hitting other students. If students (for example, wicket keepers) need to enter this designated area
  during the activity, face protection must be worn (for example, mask or helmet and mask that protects
  the face from the ball).

## **Indoors**

- Games should focus on hitting skills and placement of the ball and not hitting for distance.
- Safety modification may include establishing a height limit on the walls which the ball must stay below (for example, the height of the basketball net, a line 3 metres from the floor that goes around the gymnasium). If the ball hits above the height limit the batter is out.

# **Supervision**

- All activities must be supervised.
- The type of supervision must be commensurate with the inherent risk of the activity. The level of risk is
  related to the number of participants, the skill level of the participants, the type of equipment used, and
  environmental conditions.

- On-Site Supervision is required during the safety and initial skill instruction.
- On-Site Supervision is required for the duration of all other components of the activity (e.g., equipment setup and take down, warm-ups/cool downs, application of the skills and games).
- A Volunteer, under the direction of a Teacher, can monitor students during physical education activities. Refer to your school board's policy on Volunteers assisting with students' physical activities.
- Responsibilities must be clearly outlined for additional Teachers and Volunteers who are monitoring the activity.
- Where a Qualified Instructor is used and the Teacher is not directly with the Qualified Instructor, the
  Qualified Instructor must provide safety and initial skill instruction, and monitoring for the safe
  application of skills and student behaviour for the duration of the activity.

## **First Aid**

- A fully stocked first aid kit must be readily accessible. (Consult Sample First Aid Kit)
- A working communication device (for example, cell phone) must be accessible.
- Follow the school's first aid emergency response (consult <u>First Aid Plan and First Aid Emergency</u>
   Response) and the school board's concussion protocol (consult <u>Concussions</u>).
- An emergency action plan and response to deal with evacuations and lock downs must be followed and communicated to students.

# **Definitions**

## • In-charge Person:

Some activities refer to an "In-Charge" person. While the teacher is in-charge and responsible for
the overall safety and well-being of students under their care, sometimes there are other
personnel who must be identified as "In-Charge" related to specific situations (for example, a
pool lifeguard). In activities where an "In-Charge" person is designated, that person, in

consultation with the teacher, must make final decisions regarding safety of the students

#### • Monitor:

An individual who assists the Teacher with a group of students, (e.g., Volunteer, Qualified
 Instructor) and has a responsibility to monitor student behaviors for the duration of the activity.

## • Monitoring:

- The role of monitoring is to observe, identify, act, and report:
  - Observe: Observe with attention to detail the actions of the students.
  - Identify: Identify the student and the unsafe behaviour.
  - Act: Take appropriate actions to safeguard students and others (e.g., stop the activity).
  - Report: Provide the name of the student and the unsafe behaviour to the teacher for management and direction.

## • Outside Activity Provider:

 A commercial company, volunteer organization, or individual, not associated with the school board, who possess the required qualifications to provide safety and initial skill instruction, and monitoring for the duration of an activity.

## • Qualified Instructor:

An individual who provides safety and skill instruction, and monitoring for an activity, and
possesses the required qualifications (e.g., experience, certifications). This role could be fulfilled
by a teacher, volunteer, or an employee of an outside provider. An instructor does not have the
authority to supervise.

#### • Supervision:

 The vigilant overseeing of an activity for management or direction. Activities, facilities, and equipment have inherent risks, but the more effectively they are supervised, the safer they become.

- The Ontario Physical Activity Safety Standards in Education includes three Types of supervision,
   Direct Supervision, On-Site Supervision, and In-the-Area Supervision. These types of supervision take into consideration the level of risk, which is related to the number of participants, the skill level of the participants, the type of equipment used, the environmental conditions, the age, and developmental stage.
- The three types of supervision described are not hierarchical but represent the type of supervision that activities require and the type of supervision that is inherently possible.
- Some activities in OPASSE transition from one type of supervision to another type of supervision (e.g., Direct Supervision to On-Site Supervision OR On-Site Supervision to In-the-Area Supervision).

#### • Teacher:

 A person with a current certification from the Ontario College of Teachers and under contract by the school/school board (i.e., teacher, vice-principal, principal). This person is legally responsible for the students and has the authority and responsibility to supervise.

## • Types of Supervision:

#### Direct Supervision:

 Direct Supervision requires that the Teacher is physically present at the activity, providing visual and verbal oversight for management and direction of both, the activity and student safety.

#### Provisos:

- No other activity can occur when part of the activity or the entire activity is under Direct Supervision when there is only one Teacher supervising.
- The Supervision section of the relevant activity safety standards page in the Ontario Physical Activity Safety Standards in Education describes when parts of an activity are under Direct Supervision.

- Where a Qualified Instructor(s) is providing the safety and initial skill
  instruction and monitoring for one activity and requires the Teacher to be
  present at that activity for management and direction.
- An activity may be under Direct Supervision:
  - During the entire duration of the activity;
  - During the set up and take down of equipment; .
  - During the safety and initial skill instruction;
  - During the performance/practice of the activity skill; and
  - When the activities transition from Direct Supervision to On-Site Supervision.

## In-the-Area Supervision:

The Teacher is located in proximity to a combination of locations where the student activities take place, is circulating, and is accessible for providing management and direction of the physical activity and student safety.

#### Provisos:

- The Teacher is circulating between the activities occurring at separate locations, and is readily accessible, or the location of the Teacher is communicated to the student.
- Where a Qualified Instructor(s) is providing the safety and skill and instruction and is monitoring at a combination of locations, the Teacher is located in proximity to where the student activities take place, is circulating between the activity locations, and is accessible for management and direction.
- Students may be out of sight for periods of time.
- An activity or a component of the activity is under In-the-Area Supervision:

- Where the same activity is located in separate locations (e.g., Fitness activities);
- Where two or more activities under In-the-Area Supervision occur in separate locations (e.g., Badminton, Table Tennis, Handball (Wall));
- Where the skill application of the activity takes place at a separate location from the teacher (e.g., Cross Country Running, Skiing (Alpine), Cycling, hiking on trails);
- When the activities occur in double or triple gymnasiums; and
- Where more than one Qualified Instructor is providing activities at a combination of locations.

#### o On-Site Supervision:

The Teacher is present at one location where the student activity takes place (e.g., gymnasium, sports field, climbing wall at an Outside Activity Provider's facility, campsite) and is accessible for providing management and direction of the physical activity and student safety.

#### Provisos:

- Where more than one activity occurs in one location, the Teacher is circulating between the activities and is accessible for management and direction.
- Momentary presence in adjoining rooms (e.g., equipment room, outdoor storage shed, boathouse, staff tent) is considered to be On-Site Supervision.
- Where a Qualified Instructor(s) is providing the safety and initial skill instruction and monitoring for an activity or a combination of activities at one location and the Teacher is present and is circulating and accessible for management and direction.
- An activity may be under On-Site Supervision:

- During the entire duration of the activity;
- During the safety and initial skill instruction;
- With activities using multiple stations while the Teacher is circulating;
- When combining two or more activities at one location while the Teacher is circulating; and
- When activities transition from On-Site Supervision to In-the-Area Supervision.

#### • Volunteer:

A responsible adult (e.g., Educational Assistants, Retired Teachers, Co-op Students,
 Parents/Guardians, Teacher Candidates) approved by the Principal/Designate who is under the direction of a Teacher and has been instructed on their monitoring responsibilities. Refer to your school board's policy on volunteers assisting with student's physical activities.
